

X&L TOURS AND TRAVEL COMPANY PROJECT

PRESENTED BY: MONICAH WANJIRU

ABOUT US

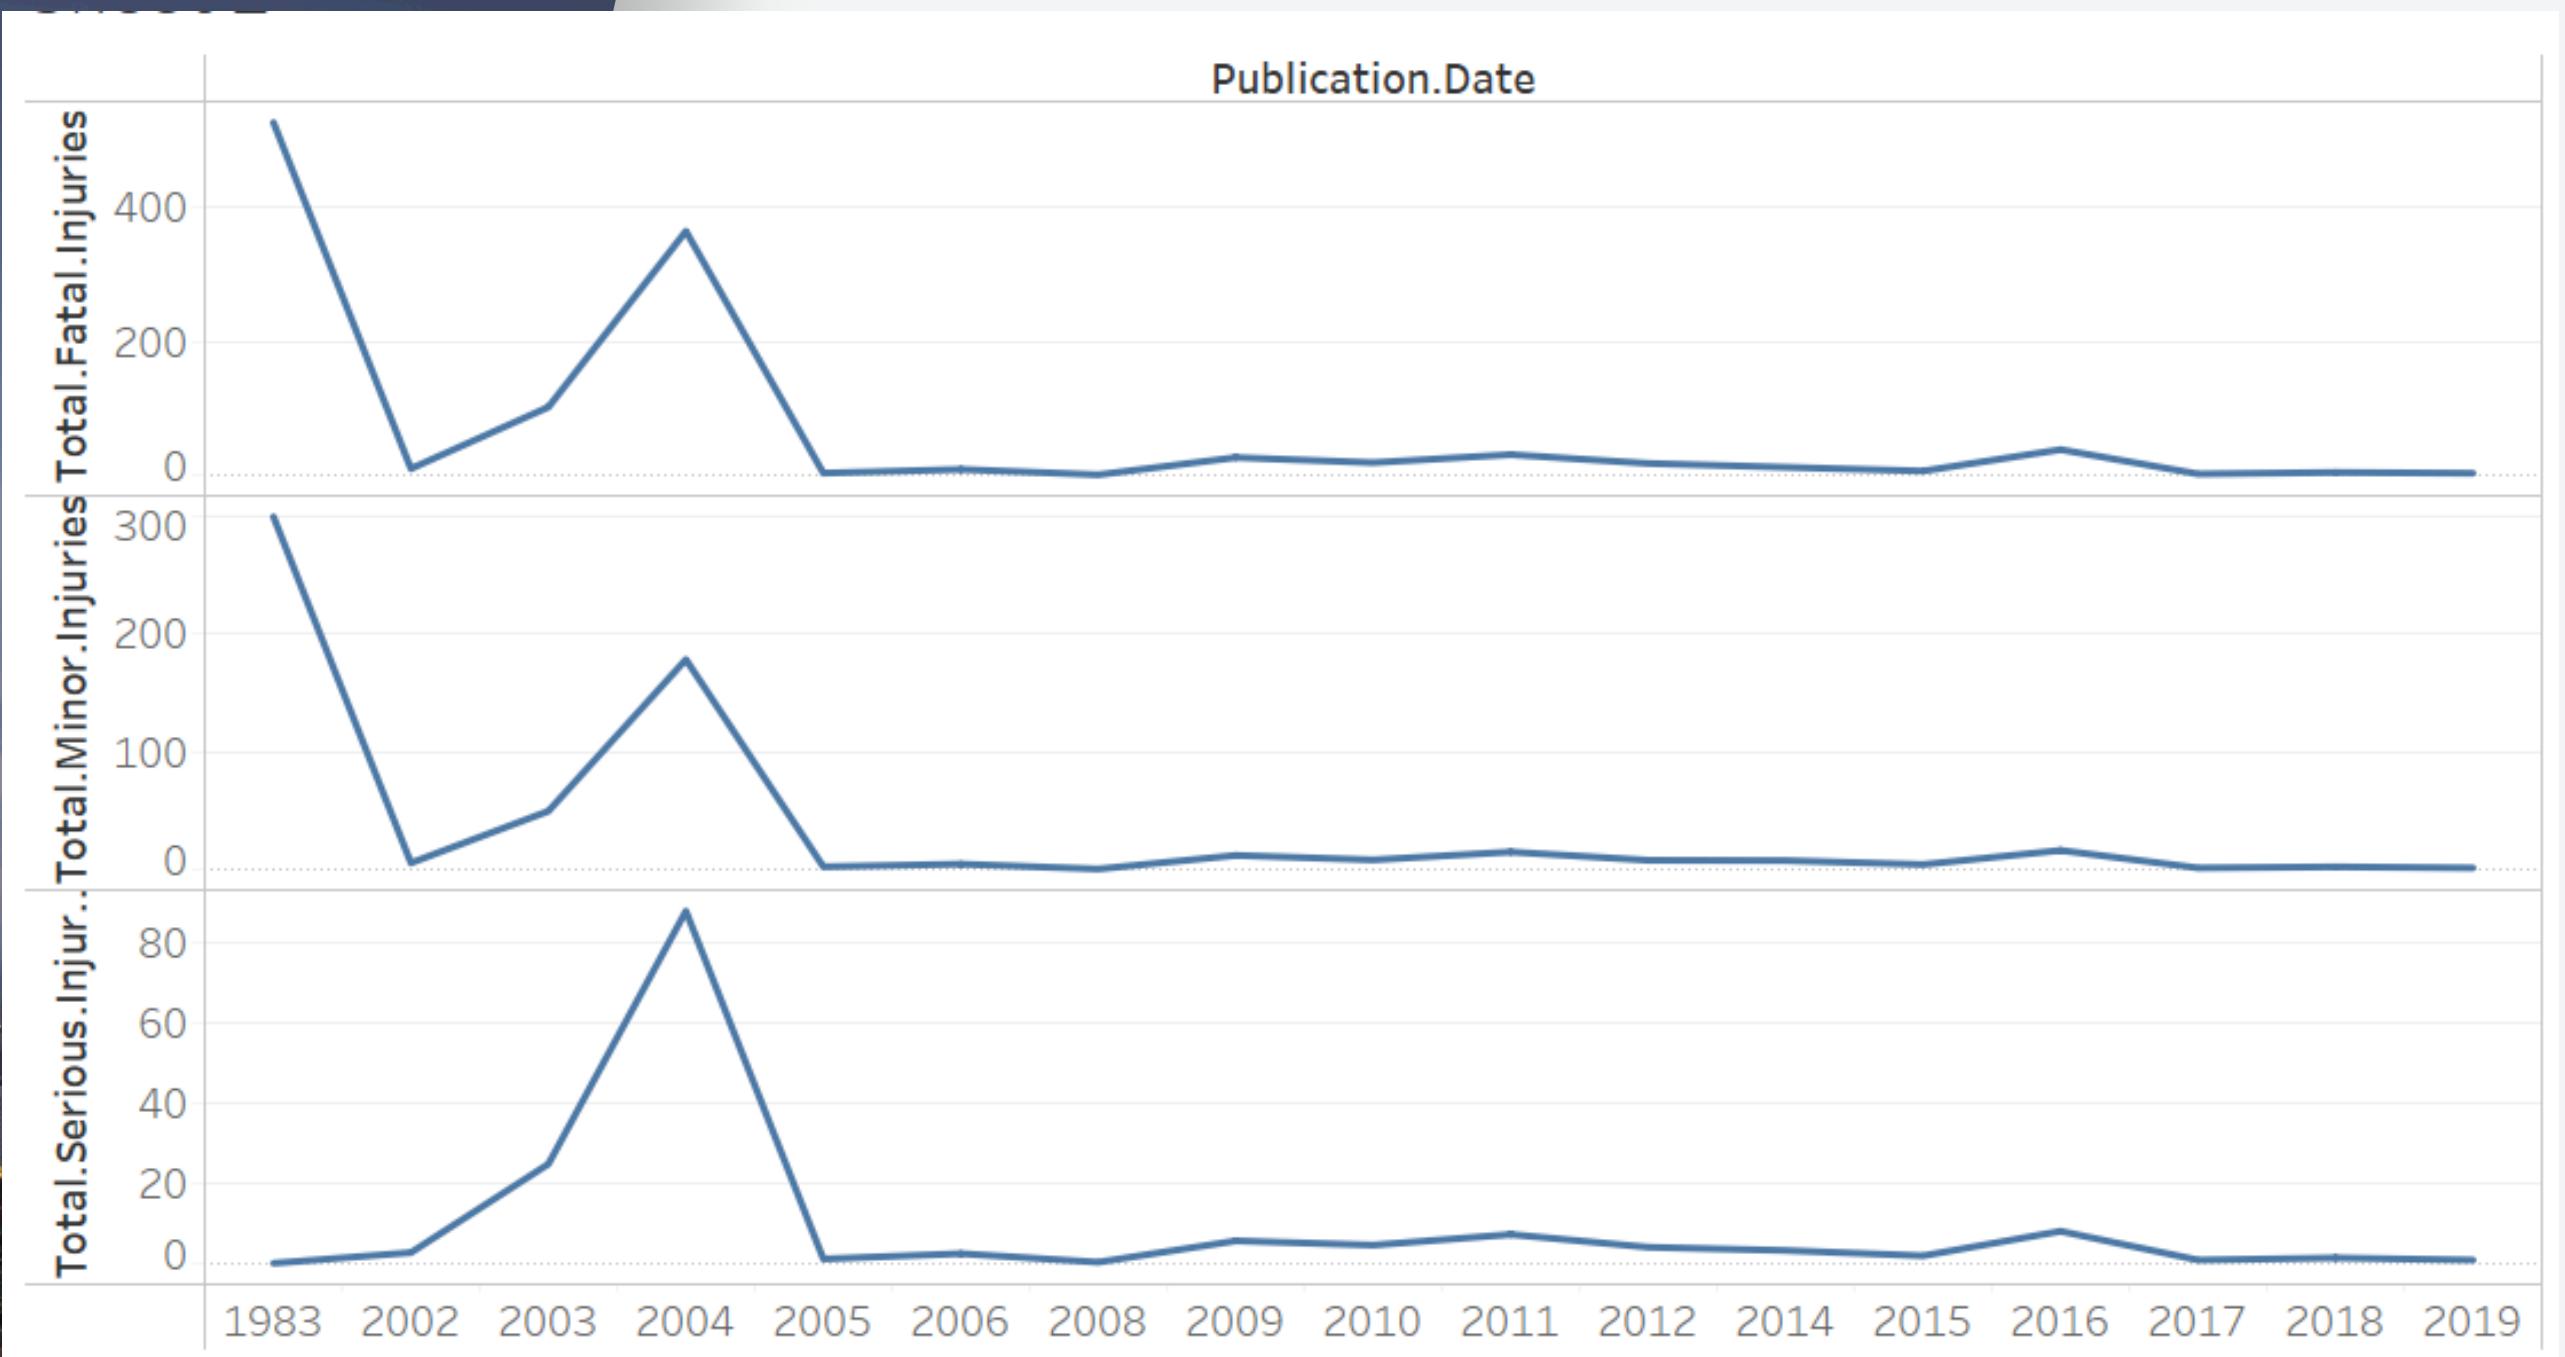

X & L is a company incorporated in Kenya in the year 1999. The company has 50 employees. The company prides itself in providing a life time experience to our fun loving clients, through continuous improvement of our services and addition of new ones.

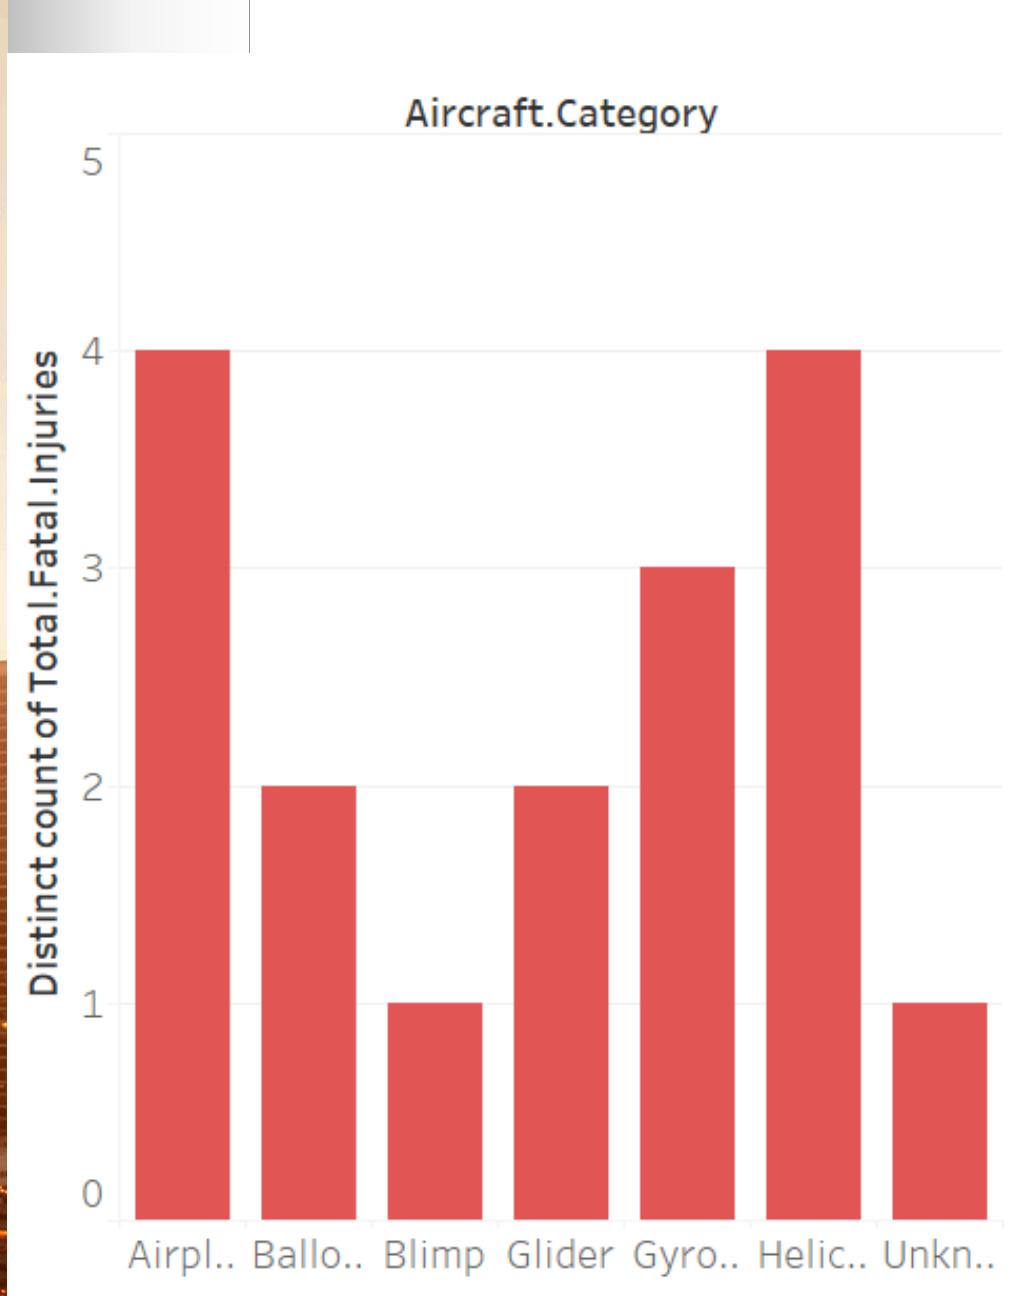

The company is seeking to diversify into new industry where we are looking forward to provide air transportation to our clients. The company seek to introduce commercial and private aircrafts. To do this the company has to decide which aircrafts have the lowest risk that it can purchase for its new business.

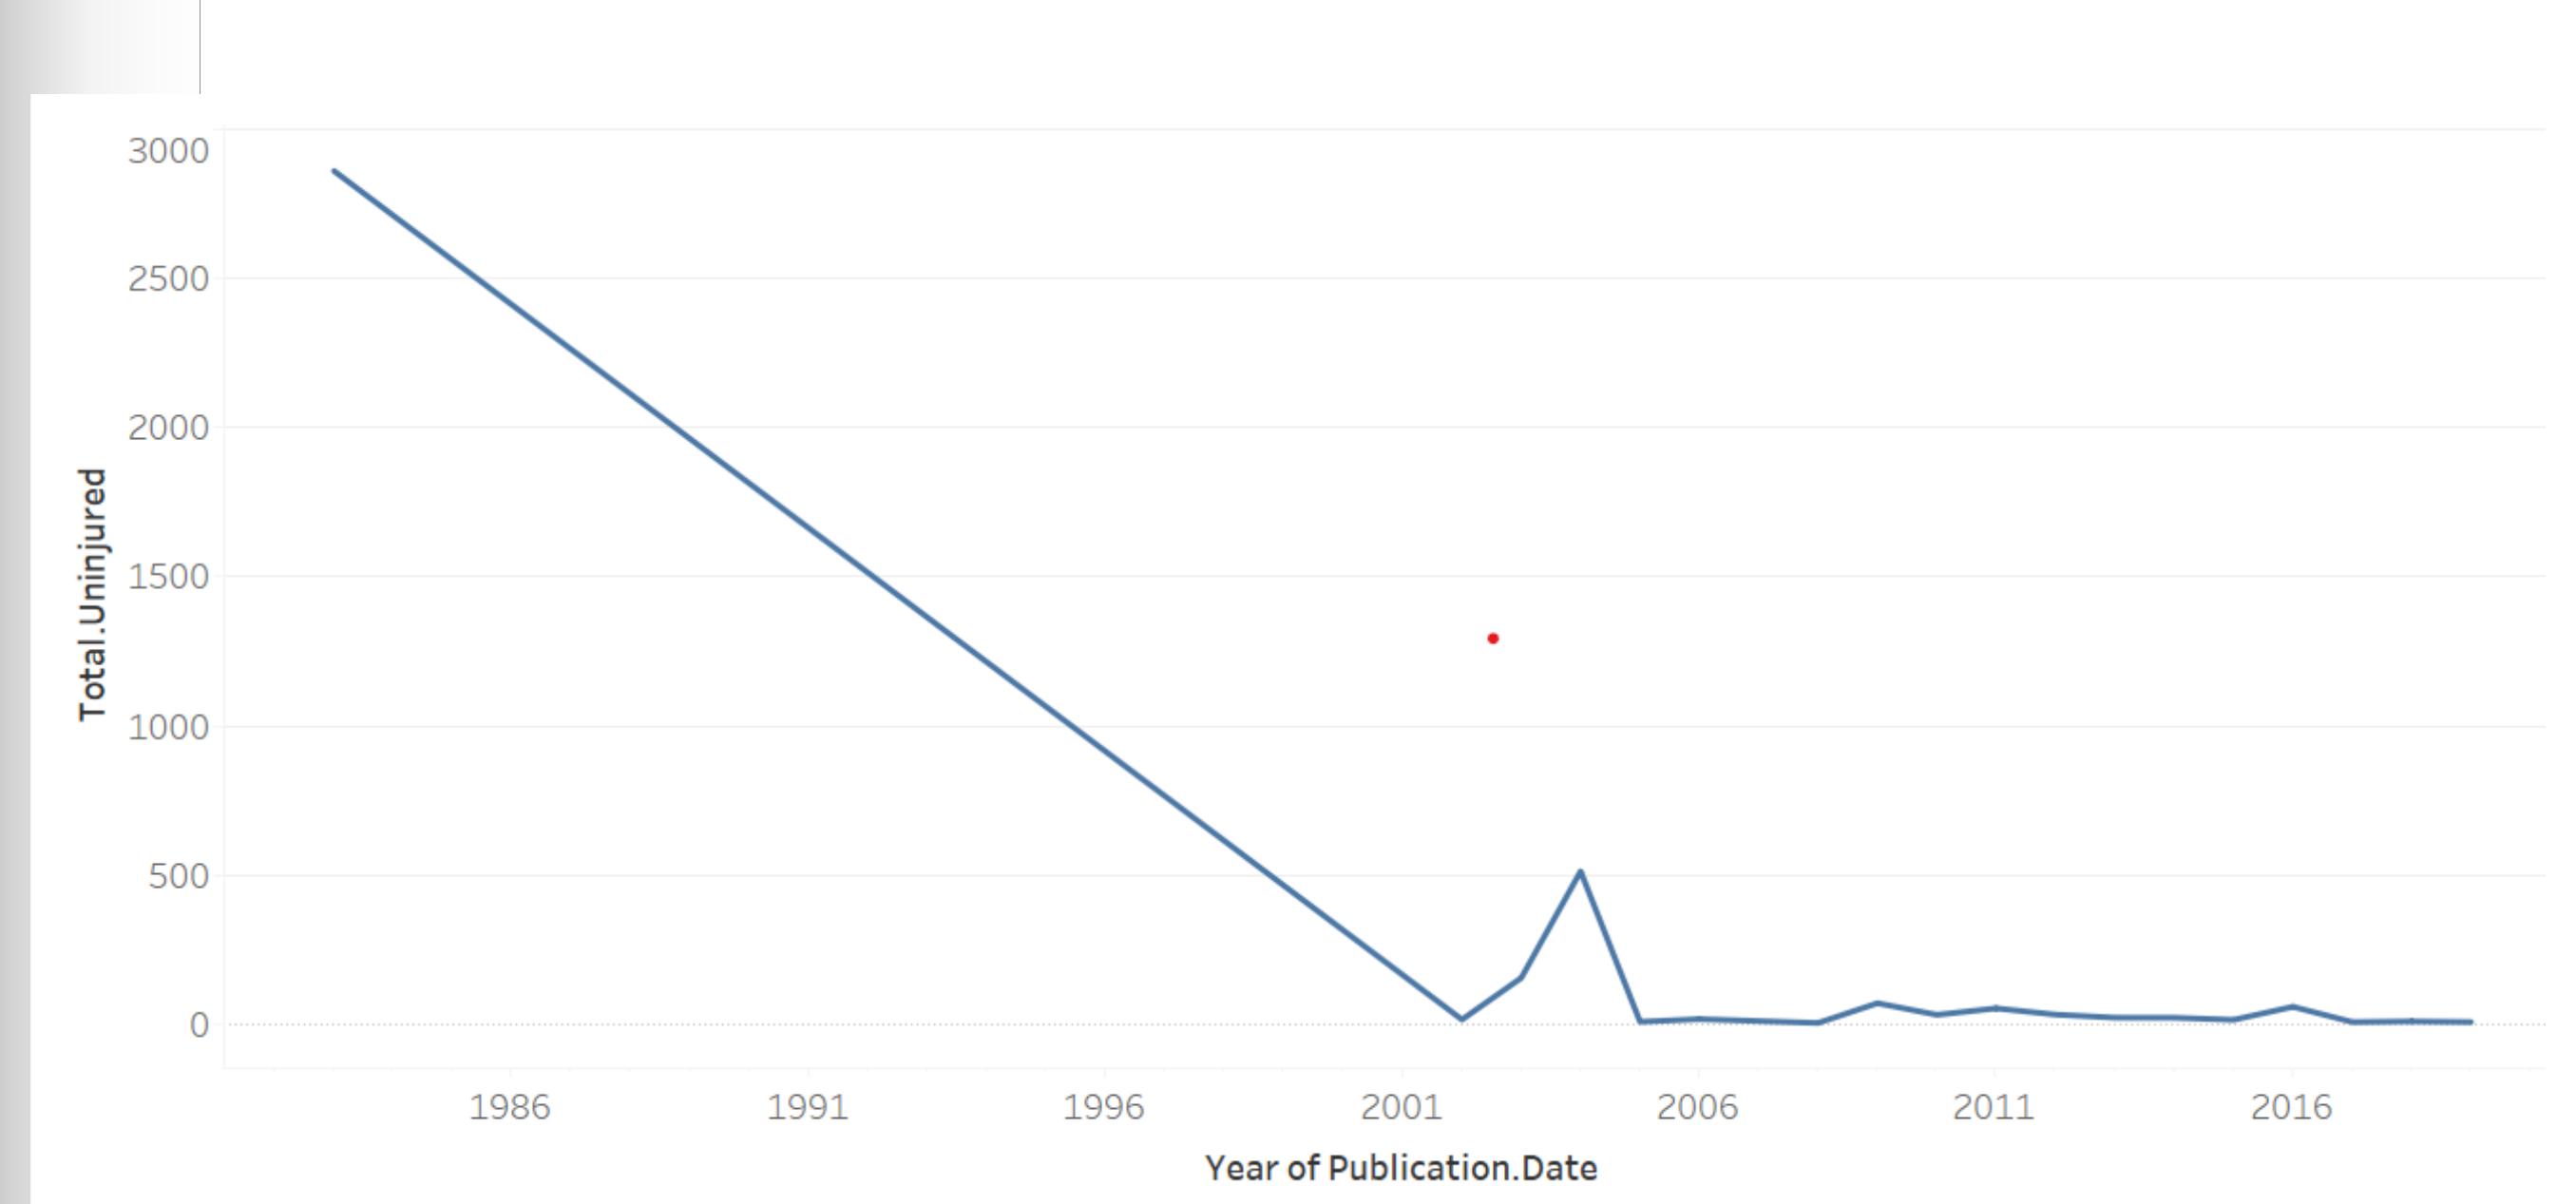

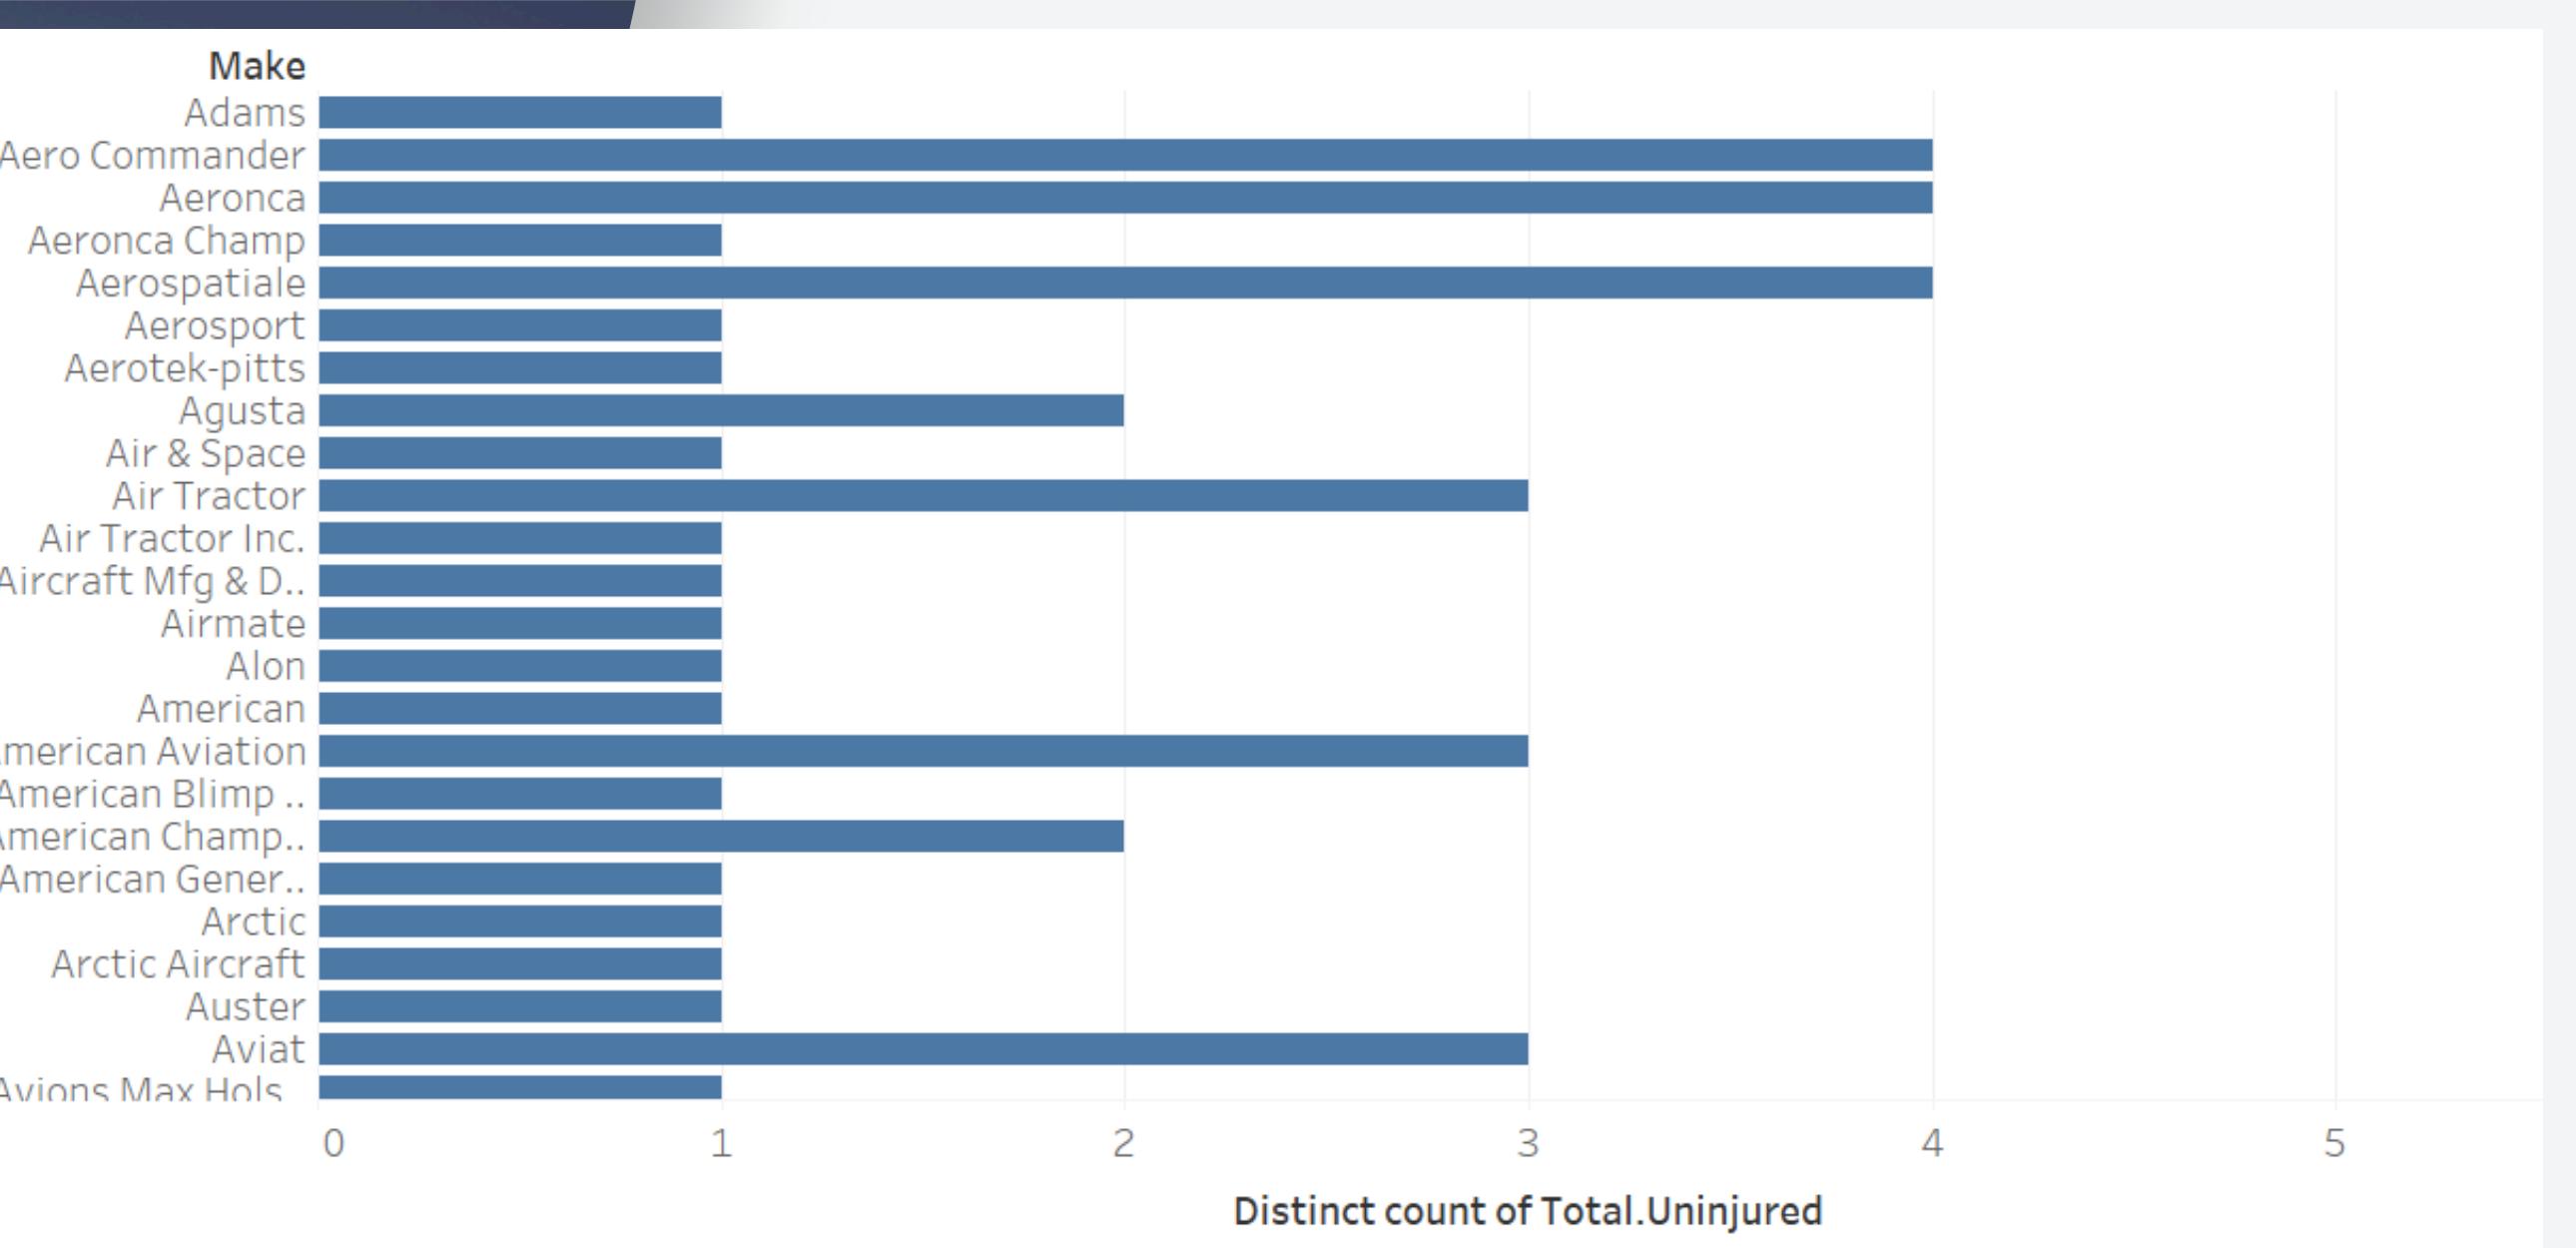

Air crafts manufactured in the year 2004 witnessed the highest number of fatal ,minor and serious injuries, while those manufactured in 2015, 2018 and 2019 were relatively low.

- The graph above shows that airplane and helicopter registered the highest number of fatal injuries while blimp had the lowest.

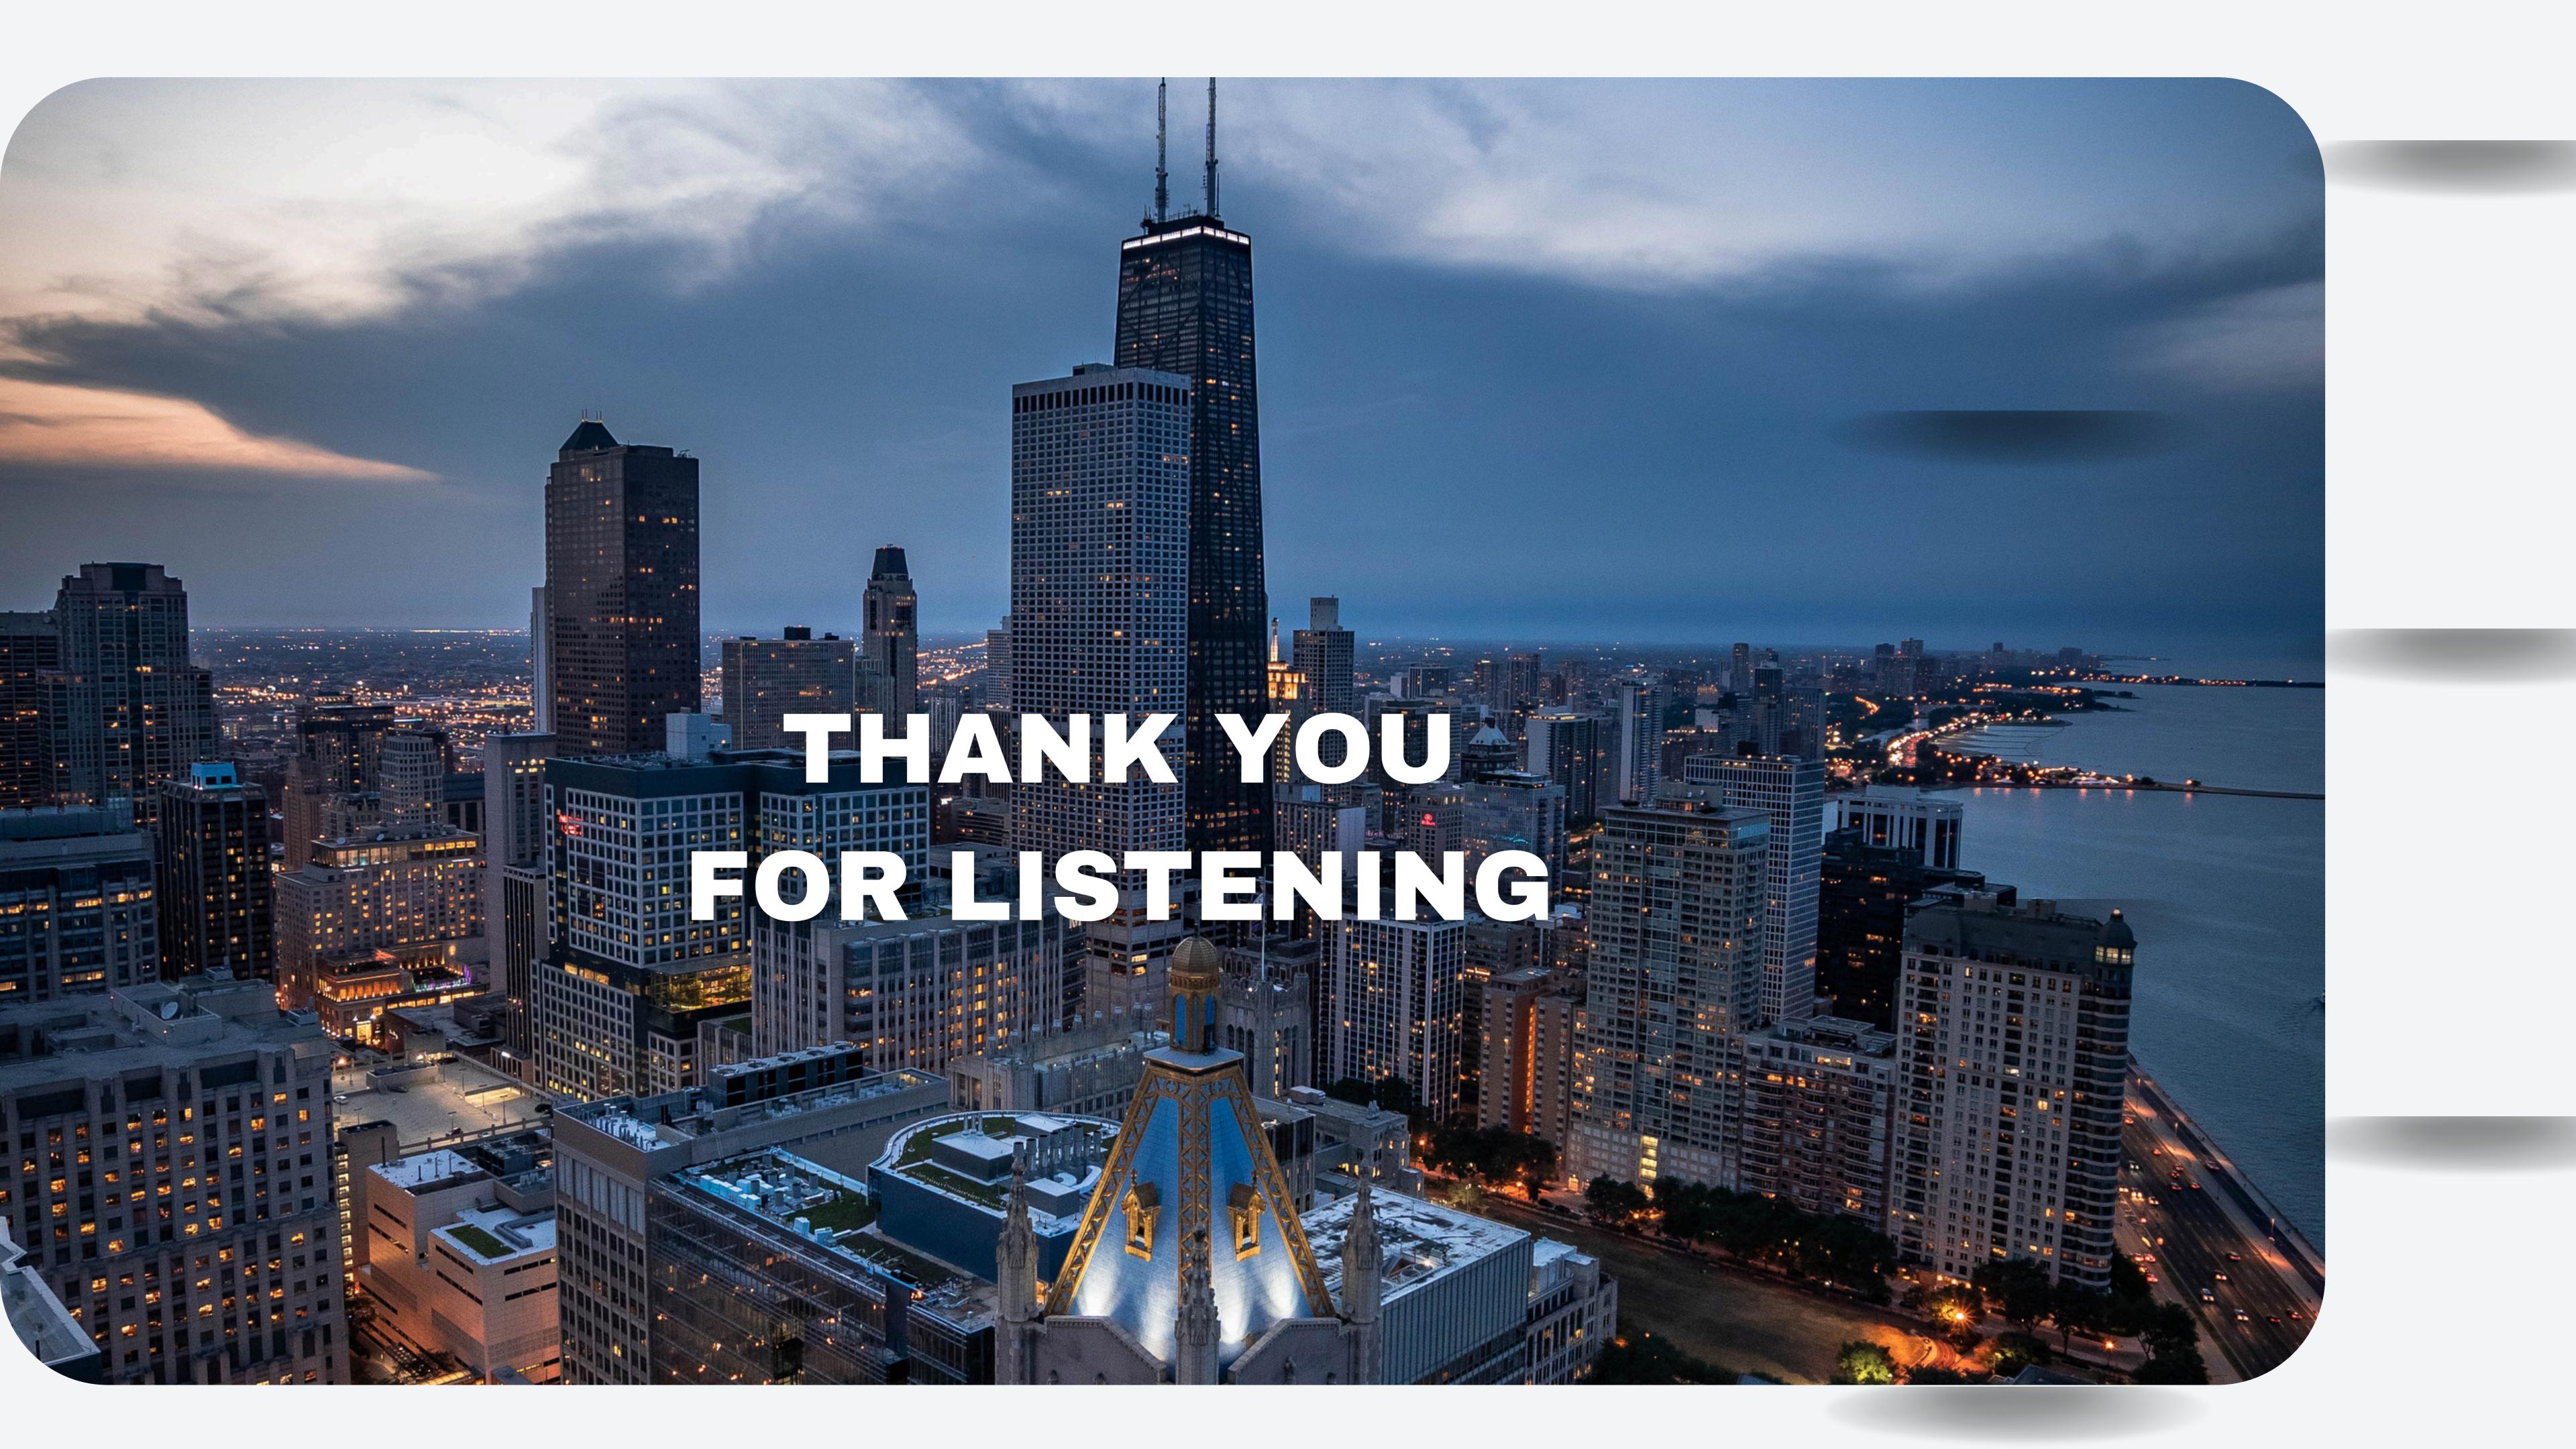

the years of publication between 1986 and 2001 show a sharp decline in the number of uninjured

the air craft makes Adams, Aero commander and Aeroco chamo had the highest number of uninjured

Recommendations

1. The company should consider purchasing aircrafts manufactured in the years 2015, 2018 or 2019 since they had the lowest number of injured in the categories fatal, serious and minor injuries
2. The air crafts makes Adams, Aero commander and Aeroco chamo registered the highest number of uninjured passenger making them good and resilient and a good investment with lower risk of injuries
3. The company should avoid aircrafts manufactured in the year 2004 since they pose high risk of injuries in all the categories studied

The background image shows a panoramic view of the Chicago skyline during dusk or early evening. The Willis Tower (formerly Sears Tower) stands prominently in the center, its upper floors illuminated. The city is densely packed with skyscrapers of various heights, their windows glowing with lights. In the foreground, the spire of a church building is visible. To the right, the Chicago River and Lake Michigan are visible, with a bridge spanning the river. The sky is filled with scattered clouds.

**THANK YOU
FOR LISTENING**

Dissussion

I welcome questions you may have in regard to the study and findings. Please feel free to reach out for further information or clarification.
